REGISTER OF RAINFALL IN 1908

Kept at Maydon
in the County of Winnipeg
by H. Y. Jones

Pattern
RAIN GAUGE Diameter of top in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level ft.
Time of Observation 9 a.m.
Nearest Railway Station Name H. T. Jones
Distance 7 Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 19 09

FORM A2.
BRITISH RAINFALL.
8 JAN 1910

Kept at Leigh Hill Reservoir.
in the County of Somerset. 3
by H. V. John, Waterworks Manager.

Pattern _____
RAIN GAUGE Diameter of top _____ in.
Height of top above Ground _____ ft. _____ in.
" " " Sea Level 524 ft.
Time of Observation about 9 a.m. per back of form B.
Nearest Railway Station { Name _____
Distance _____ Direction _____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A.2.
BRITISH RAINFALL.
-7 JAN 1911

Kept at Banwell
in the County of Somerset
by Kenneth Anderson

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 6 in.
" " " Sea Level 50 ft.
Time of Observation 9 am
Nearest Railway Station { Name Sandford + Banwell
Distance 1 mile Direction E GWR

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

BRITISH RAINFALL.
11 JUN 1912
in.
ound ft. in.
Level ft.
me
tance Direction

IMPORTANT NOTE.
The result entered to the
previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly
requested to add the reading at 9 a.m. on 1st January of the following year in the space provided
for it at the end of this paragraph. Full instructions for the measurement of rain,
the selection and placing of rain gauges, and particulars as to the British Rainfall
Organization are given in "Rules for Rainfall Observers," sent post-free on application to
Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909
Copy from original returned to observer

FORM A2.
BRITISH RAINFALL
11 JUN 1912

Kept at Lapacote, Combe Down
Bath
in the County of Somerset
by Miss E. H. Scriven

RAIN GAUGE
Pattern
Diameter of top _____ in.
Height of top above Ground _____ ft. _____ in.
" " " Sea Level _____ ft.
Time of Observation _____
Nearest Railway Station { Name _____
Distance _____ Direction _____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

Kept at 16 Somerset Place Bath

in the County of Somerset

by R. Lewis Lloyd

Pattern
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground ft. 10 in.
" " " Sea Level 250 ft.
Time of Observation 9.2 Daily
Nearest Railway Station { Name Bath
Distance 1 1/2 miles Direction S

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REPORT OF RAINFALL IN 1904

Kept at Wacona House, P. Rickmoller
in the County of Somerset
by A. Y. Saddle

Lat. _____ Long. _____
Time of Observation _____
Nearest Railway Station _____
Diameter of Funnel of Rain Gauge _____ in.
Height of top of Gauge above Ground _____ ft. _____ in.
" " " " Sea Level _____ ft.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m. and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to THE SUPERINTENDENT, British Rainfall Organization, 62, Camden Square, London, N.W. 1.

REGISTER OF RAINFALL IN 1910

Kept at Blake gardens, Bridgwater

in the County of Somerset

by Bridgwater Town Council

Pattern Negretti & Zamboni
 RAIN GAUGE Diameter of top 5 in.
 Height of top above Ground 3 ft. 1 in.
 " " " 6 in. at Sea Level 27.05 ft. 2031
 Time of Observation 9 a.m.
 Nearest Railway Station { Name Bridgwater
 Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
26 JAN 1911

Kept at *King's School, Bruton*
in the County of *Somerset*
by *J. E. Martin* *2*

PATTERN
RAIN GAUGE Diameter of top *5* in.
Height of top above Ground *1* ft. *6* in.
" " " Sea Level *200* ft.
Time of Observation *9 a.m.*
Nearest Railway Station { Name *Bruton*
Distance *450* Direction *E*

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A.
BRITISH RAINFALL
30 JAN 1911

Kept at Burnham
in the County of K. Somerset
by H. A. P. Sparks Eng

Pattern _____
RAIN GAUGE Diameter of top _____ in.
Height of top above Ground _____ ft.
" " " Sea Level _____ ft.
Time of Observation _____
Nearest Railway Station { Name _____
Distance _____ Direction _____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL
19 JAN 1911

Kept at Charlcombe
in the County of Somerset
by Bath Waterworks

Pattern _____
RAIN Gauge Diameter of top 8 in.
Height of top above Ground 2 ft. in.
" " " Sea Level 325 ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name _____
Distance _____ Direction _____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A2
 BRITISH RAINFALL
 - 6 JAN 1910

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL
- 5 JAN 1911

Kept at Blutton Council School.

in the County of Somerset

by Jno. Fuller

Pattern _____
RAIN Gauge Diameter of top _____ in.
Height of top above Ground _____ ft. _____ in.
" " " Sea Level 420 ft.
Time of Observation 9 a.m.
Nearest Railway Station { Name Blutton
Distance 250 yds Direction E.S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

BRITISH RAINFALL FORM A 2
 13 JAN 1910

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

Kept at Lairland School
in the County of Somerset
by The School Children

Pattern _____
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 332 ft.
Time of Observation 9-30 A.M.
Nearest Railway Station { Name Portbury
Distance 2 m. Direction N.W. by W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Fairbank H. M. Bristol.

14: Jan: 1921.

To the Superintendent.

Rainfall Organization.

Dear Sir, in sending in my rain record I should like to call yr. attention to the original pencil record as written daily by our old gardener. The want of lines horizontally has given rise to some uncertainty in the last week of January: probably you can judge by ~~my~~ to other local records if my transcript is correct.

I think I am still right in giving Pell as our nearest station: but recently a hall has been opened at Portney Shipyard, which is

not marked on any map Name: - still
I do not think it is quite so near
to as Pile, tho' a good second.

Yrs. faith fully

Augustine

Dear Mr. Satter,

I much regret delay in
sending in my recent fall report.

Will you kindly correct or confirm (for your
own purposes) the entry on 22: Aug. 1913? I
have an idea that it may be an error, in
confusion with the entry on 24 Aug.

I hope you have good news of Dr. Mill.

Yrs. faithfully

Agnes F. G.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
-6 JAN 1911

W 9
Rept at *Flax Bourton*
in the County of *Somerset*
by *C. Ouslow Master*

RAIN GAUGE { Pattern _____
Diameter of top _____ in.
Height of top above Ground _____ ft. _____ in.
" " " Sea Level _____ ft.
Time of Observation *9 am*
Nearest Railway Station { Name *Flax Bourton*
Distance *1/2 mi* Direction *NE*

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

Kept at Frome U.D.C. Water Works
Egford nr Frome
in the County of Somerset

F. W. JONES, ASSOC. M. INST. C.E.
Engineer to the Council.

Pattern *Snowdon*
RAIN GAUGE Diameter of top 8 in.
Height of top above Ground 2 ft. 0 in.
" " " Sea Level 270 ft.
Time of Observation 9 am.
Nearest Railway Station { Name *Frome*
Distance $1\frac{3}{4}$ miles Direction *E.*

IMPORTANT NOTE.—Rainfall should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

Kept at *Downside Waterworks*
Gurney Slade
 in the County of *Somerset*
 by *J.P. Whiteside*

Pattern *J.G. Hicks*
 Diameter of top *6* in.
 Height of top above Ground *1* ft.
 " " " Sea Level *588* ft.
 Time of Observation *9 a.m.*
 Nearest Railway Station { Name *Binegar*
 Distance *1 ml.* Direction *S.W.*

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

FORM A2
BRITISH RAINFALL
4 JAN 1910

Kept at Inwood
in the County of Dor
by Wm Hester

1909 - 1910

n.
d. 1 ft. — in
evel 350 ft.
Henstridge
be. 1 mile Direction S. to

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

Kept at Whitlakington
in the County of Somerset
by Saml Creed

Pattern _____
RAIN GAUGE Diameter of top 5 in.
Height of top above Ground 3 ft.
" " " Sea Level 200 ft.
Time of Observation 9 AM
Nearest Railway Station { Name Ilminster
Distance 2½ Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "Rules for Rainfall Observers," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.
